Sequence 4330, Application US/09817879

Publication No. US20030171311A1

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals Inc.

TITLE OF INVENTION: Hepatitis C Virus Infection

TITLE OF INVENTION: Hepatitis C Virus Infection

TITLE OF INVENTION: MABBE: US/09/817,879

CURRENT APPLICATION NUMBER: US/09/817,879

CURRENT APPLICATION NUMBER: 2001-03-26

NUMBER OF SEQ ID NOS: 9703

SOFTWARE: Patentin version 3.0

SEQ ID NO 4230

Sequence 412, Application Wo. US20030113891A1

GENERAL INFORMATION:

APPLICANT: Ribozyme Plantmaceuticals, Inc.

APPLICANT: Lawrence Blatt

APPLICANT: Lawrence Blatt

APPLICANT: Dames McSwigen

APPLICANT: Dames McSwigen

APPLICANT: Bharat Chowrira

ITILE OF INVENTION: Method and Reagent for the Inhibition of NOGO and NOGO Receptor

ITILE OF INVENTION: Method and Reagent for the Inhibition of NOGO and NOGO Receptor

ITILE OF INVENTION NUMBER: US/09/827,395A

CURRENT FILING DATE: 2001-04-05

PRIOR APPLICATION NUMBER: 60/180,533

PRIOR APPLICATION NUMBER: 60/181,797

PRIOR APPLICATION NUMBER: 60/181,797

SECOND NOS: 2617

NUMBER OF SEQ ID NOS: 2617

SECOND NOS: 2617
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  APPLICANT: Lawrence Blatt

Sequence 216, Application US/09864785
Patent No. US20020177568A1
GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Stinchcomb, Dan
APPLICANT: McSwiggen, Jim
TITLE OF INVENTION: Enzymatic Nucleic Acid Treatment of Diseases or Conditions Rela
TITLE OF INVENTION: Levels of NF-Kappa B
FILE REFERENCE: 400/022 (MBHB00-812-D)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ;

Patent No. US20020177568A1

GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Stinchcomb, Dan
APPLICANT: Braper, Ken
APPLICANT: Draper, Ken
APPLICANT: McWiggen, Jim
TITLE OF INVENTION: Enzymatic Nucleic Acid Treatment of Diseases or Conditions RelaTITLE OF INVENTION: Levels of NF-Kappa B
FILE REFERENCE: 400/022 (MBHB00-812-D)
CURRENT APPLICATION NUMBER: US/09/864,785
CURRENT FILING DATE: 2001-05-23
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             .
